

Make USMLE prep measurable, and your students coachable.

MDSteps Campus is the **plan + visibility layer** that sits above the resources you already use. Students get adaptive practice and timely remediation; faculty see cohort-level pacing, mastery, and early risk—without writing new content. Programs use the data to reduce remediation, support LCME/ACGME reporting, and lift shelf/Step outcomes.

80%+	↓20%	+X pts
weekly active rate in pilots	size of at-risk list by week 6	median NBME delta by week 4

MDSteps Campus

One place to plan, practice, and prove learning

Learners keep the resources they trust (UWorld, AMBOSS). MDSteps provides pacing, targeting, and proof: weekly plans feed adaptive practice; misses become next-day review; dashboards show who is ready and who needs support.

Cohort & Faculty Dashboard — mastery and pacing by system, adherence trends, early-risk flags.

Block/Clerkship Templates — assign in minutes; map to your syllabus and shelf calendars.

Automated Remediation — missed-item decks + one-page cheat sheets with spaced repeats.

Accreditation-friendly evidence — mastery & engagement data for LCME/ACGME reporting.

Equity in support — consistent, automated follow-ups across clerkships and sites.

Operational simplicity — de-identified roll-ups by default; CSV exports for reporting.

Integrations & Compliance

Easy to adopt. Secure by design.

- SSO / LTI 1.3 — Canvas, Blackboard, Brightspace, Moodle (manual invites to start).
- FERPA statement and HECVAT-Light available; DPA on request.
- WCAG 2.1 AA alignment; VPAT summary available.
- CSV exports and role-based access; least-privilege and student data segregation.

8–12 Week Pilot

Low-lift pilot. Clear success criteria.

Stand up a single cohort (40–80 learners). We handle onboarding, weekly nudges, and roll-ups. Your faculty observes the dashboard and meets with us briefly for readouts.

- **Engagement:** $\geq 80\%$ weekly active; adherence trend by week and block.
- **Readiness:** NBME delta at week 4; mastery by system; shelf/Step alignment.
- **Risk:** at-risk list \downarrow by week 6; remediation completion rates.
- **Experience:** faculty NPS ≥ 8 ; time saved vs. manual tracking.
- **Commercial:** credit any pilot fee toward your license.

Institutional Options

Choose the right footprint for your program

Cohort Pack 50–150 seats	4–6 months • one Step. Dashboard & block templates. Seat management, analytics & CSV export; onboarding & office hours.
Department License (Most popular) 150–500 seats	Annual • Step 1 + CK • LTI/SSO optional. Templates library, at-risk flags, adherence tracking, quarterly outcomes review.
Campus License Unlimited	All MD students • annual. Step 3/CCS workshops and dedicated CSM. Custom reports, curriculum mapping, faculty seat bundle, SLA.
